Objective Well rounded military professional with eight years electronic aviation experience, seeking career opportunities in Nevada County. I am looking for a position that will augment my income while I am pursuing an architecture program with Sierra College. Prefer part-time position although I am willing to work full-time if desired.

Employment NOV 2008- PRESENT KBR- US Army Contractor *Bagram, Afghanistan*
TMDE Foreman
Calibrated and certified Test, Measurement and Diagnostic Equipment (TMDE) traceable to the National Institute of Standards Technology utilizing certified laboratory standards and manufacture, commercial or military procedures. Managed equipment calibration inventory of 6,000 items. Contact for 60 customer accounts; provided calibration support services to include: master inventory listings, projected schedules, delinquency reports and coordinator for off-site calibrations/shipping. Assigned to KBR Government and Infrastructure services under Task Order 161/Logistics Civil Augmentation Program (LOGCAP III).

AUG 2008- NOV 2008 KBR- US Army Contractor *Balad, Iraq*
Radio Technician, MOS: 35E
Maintained and repaired SINCGARS radios, power supplies, night vision devices, and Bose head sets for the US Army during Operation Iraqi Freedom. Troubleshoot convoy radio systems for malfunctions and defective components. Assigned to KBR Government and Infrastructure services under Task Order 159/Logistics Civil Augmentation Program (LOGCAP III).

FEB 2001- JUL 2008 United States Air Force *Worldwide*
Loadmaster Journeyman C-130E/H Aircraft, AFSC: 1A251 (1.5 years)
Prepared all aircraft cargo loads; supervised ground personnel involved with loading & offloading operations. Computed aircraft weight & balance data; performed all appropriate preflight and post flight aircraft inspections. Operated aircraft systems for loading & offloading operations; ensured cargo is properly restrained for flight. Performed aircraft preparation, rigging of airdrop equipment/materials/paratroopers for aerial delivery missions. Obtained the required signatures and maintained copies of transportation documents for future references. Reviewed passenger manifests for possible inaccuracies, and coordinated corrective measures with passenger representatives. Knowledge of types, capacities, and configuration of transport aircraft; weight and balance factors, arithmetic; cargo restraint techniques; emergency equipment and in-flight emergency procedures; using personal equipment and oxygen, communications; current flying directives; interpreting diagrams, loading charts, and applicable technical publications; border agency clearance requirements and forms; principles of dispensing and preserving food aboard aircraft; operation of cargo loading equipment; and cargo and personnel airdrop techniques and equipment.

Electronic Technician Craftsman/Supervisor, AFSC: 2P071 (2 years)
Supervised eight-member staff with assigned maintenance functions in the AC/DC low frequency section. Identified high priority equipment and its impact on workload. Evaluated procedures for storage, inventory, and inspection of property. Provided training and assistance to customers. Managed section stock levels of expendable items. Prepared written request forms for equipment items through base supply, and searched for substitute items when items ordered are not available. Conducted inspection and inventory on Air Force Research Laboratories for compliance with Air Force Metrology program (ISO 9000). Maintained and tracked over 14,000 units of equipment inventory with automated database. Created and distributed monthly maintenance schedules, master inventories, and deficiency reports to customers and laboratory management. Coordinated maintenance calibration requirements, storage requirements, and equipment supply requirements to 450 customer base.

Electronic Technician, AFSC: 2P051 (4 years)
Inspected, repaired and calibrated test measurement and diagnostic equipment using highly accurate

Anthony Loverde

reference standards. Performed equipment maintenance using theories of operation, block diagrams, schematics, logic trees, and software diagnostics. Recorded and reported maintenance data; prepared technical order improvement reports, special training requests, training quality reports, and modification proposals. Tracked equipment warranties. Provided training and managed technical order distributions. Handled, labeled, and disposed of hazardous materials and waste according to environmental standards. Used oscilloscopes, digital multimeters, calibrators, frequency counters, amplifiers, power supplies, torque transducers, resistance standards, capacitance standards, watt meters, pressure gages, calipers, gage blocks, scales, weight standards, etc.

Assignments:

Ramstein Air Base, Germany (Dec/2001-Dec/2004)
 Edwards Air Base, California (Jan/2005-Jul/2007)
